A CATALOGUE OF STATE LONG-TERM CARE DATA SETS: 1994

Shahla A. Mehdizadeh

July 1994

Shahla A. Mehdizadeh is a research analyst with the Scripps Gerontology Center at Miami University, Oxford, Ohio. Although she has a PhD in economics and several years of experience as a statistical consultant at a university, her recent work is mostly in the field of aging. Her research interests are the economics of aging, and aging and minority populations. Dr. Mehdizadeh's major work is *Projected Need for Long-Term Care in Ohio's Older Population*, with Suzanne R. Kunkel, Robert C. Atchley, and Robert A. Applebaum of the Scripps Gerontology Center.

Introduction

In the late spring of 1990, Miami University's Scripps Gerontology Center arranged a conference on "Long-Term Care Research Challenges For Ohio." Service providers, consultants, and legislators knowledgeable in long-term care issues were invited to attend.   The main purpose of the conference was to identify the more pressing aging and long-term care research issues for Ohio. One issue that came up repeatedly was the lack and/or inaccessibility of data from one state agency to other agencies and to researchers.   As a response to this need, the Scripps Gerontology Center undertook a project to catalogue long-term care data sets in Ohio. This catalogue does not include all long-term-care data collected by all state agencies; rather, it only includes the data sets that: 1) are easily transportable, 2) do not require a large amount of effort to create a user copy, and 3) can be shared without violating a confidentiality agreement. Each catalogue entry includes the name of the data set, where the data set is housed, a contact person, and a detailed description of the data and conditions for their use. Requests concerning these data sets should be directed to the contact person.   The Scripps Gerontology Center can not handle data user requests involving data not housed at Scripps.

When you request information contained in these data sets, please consider the following:

1) The person or state agency that has agreed to provide the service is doing so as a courtesy; therefore, please be patient and allow time for completion of your request.

2) Pay special attention to the summary sheet, because detailed information is not available from all data sets. If you are requesting summary information that is not

already available, there may be a programming charge for generating the requested information.

3) At the very least, expect a charge for reproduction of the data file, for the medium on which the data will be stored, and for postage.

4) Make sure to request the data sets in a format that you can use. Discuss your or your computer facility's capability with the data provider to identify the best medium and format (use the special form provided at the end of this catalogue).

We have special permission in the form of a letter that authorizes us to include the data set in the catalogue, and permits you to request parts or all of the data set. Of course, if the data set is available through Scripps we did not need a letter. The 1980 and 1990 Ohio Census data are available from Scripps with the permission of U.S. Census Bureau.

Note: We contacted all ONECA members to review and comment on this catalogue. They were also given the opportunity to include any statewide long-term care data set that they may have. This offer is open to anyone who has a long-term care data set and is willing to make it available to other users.
